

Prerequisites for REVAMP Training on January 20th:

- ✓ Install ArcGIS Pro on your machine or Upgrade ArcPro to version 2.7
- ✓ Install Google Streetview Add-In
- ✓ Connect to Georgia GIO Imagery
- ✓ Download ArcPro Project from www.valorgis.com/REVAMP

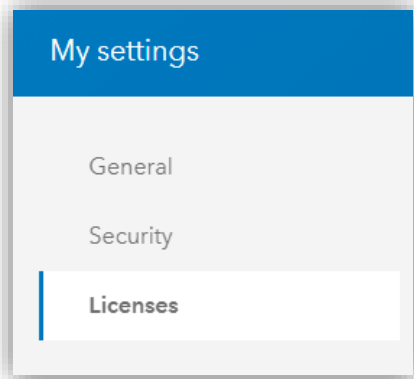

REVAMP Prerequisites Installer Resources

Download ArcGIS Pro from ArcGIS Online

1. Sign in to your GARC ArcGIS Online organization account.
2. At the top of the page, click your user name and click **My settings**

3. On the **My settings** page, click **Licenses** tab

4. Next to ArcGIS Pro, click **Download**

5. In the **Download** window, review the **Language** setting.
6. Click **Download**. An executable file (.exe) is downloaded to your computer.
7. Browse to the location where you downloaded the (.exe) file and double click on the file.
8. Accept the destination folder.
9. Click **Next**
10. A message informs you that the files have been extracted. Click **Close**.
11. On the **Welcome to the ArcGIS Pro Setup** program window, click **Next**.
12. Agree to terms: click **Next**.
13. Choose an installation option: **Anyone who uses this computer** (default) or **Only for me**
14. Click **Next**.
15. Select to install ArcGIS Pro.
16. Accept default location.
17. Click **Next**.
18. Click **Install**.

19. Click **Finish**.

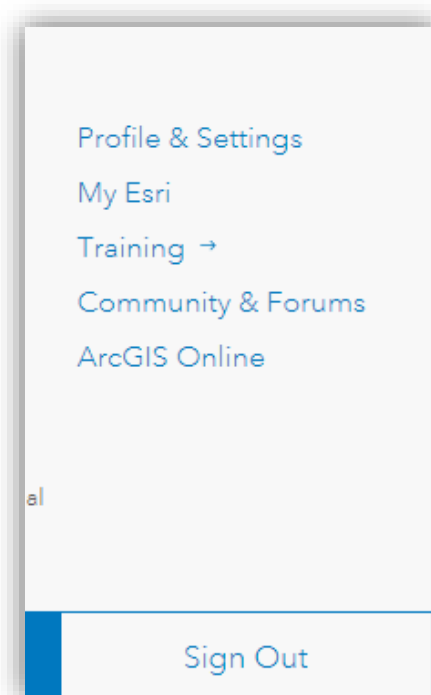

ArcGIS Pro Help

If it's your first time using Pro, there are many free tutorials available to you on ArcGIS Online:

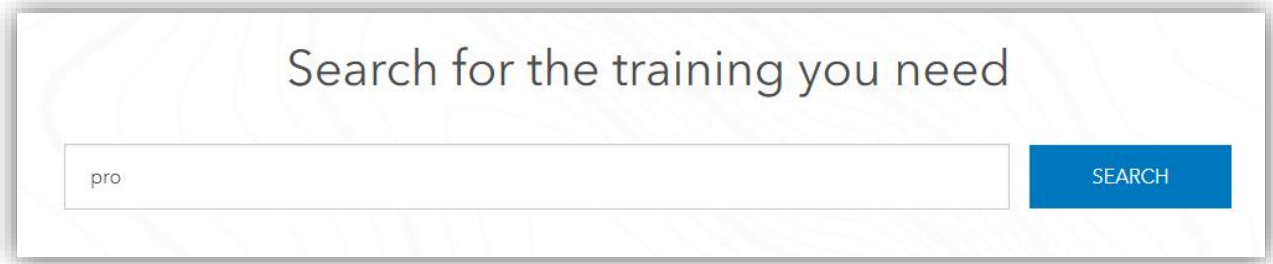

<https://www.esri.com/training/catalog/5b733doc8659c25ea7013df9/arcgis-pro-fundamentals/>

To access Esri courses:

1. Sign in to your GARC ArcGIS Online organization account.
2. At the top of the page, click your user name and click **Training**

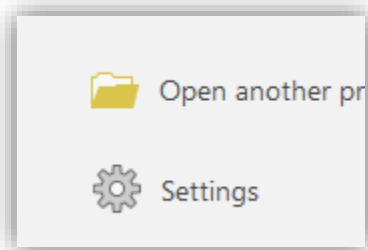

3. Use the search bar to find courses and tutorials.

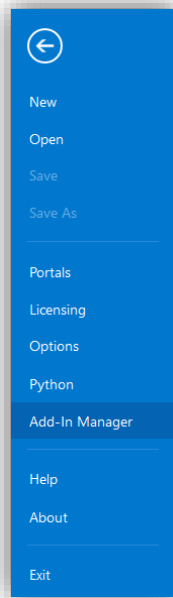

Install Google Streetview Tool

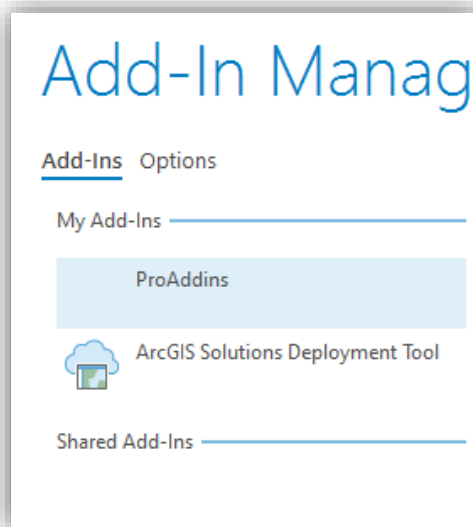

1. Download the zipped folder from the REVAMP website containing the Google Streetview tool into your AddIns folder. \\machine\ArcGISPro\AddIns
If you do not already have an AddIn folder, create one on your machine
2. Unzip folder (**Extract All...**)
If you downloaded the tool into your Downloads folder, make sure that it is extracted into the AddIns folder
3. Open **ArcGIS Pro**
4. Click **Settings** in the bottom left corner

5. Click **Add-In Manager**

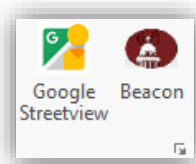

6. If ArcGIS Pro is not already pointed to the Add-In folder on your machine...
 - a. Click **Options**

- b. Click **Add Folder...**
 - c. Add the folder where you have extracted the Google Streetview tool
 - d. Check **Load all Add-Ins without restrictions**

- Load only Esri provided Add-Ins (Most Secure)
- Require Add-Ins to be digitally signed by a trusted publisher
- Load all Add-Ins without restrictions (Least Secure)

7. Close and reopen ArcGIS Pro. The Google Streetview tool is now located on your toolbar.

You will notice that the Beacon tool is also added. These come as a package deal. Unfortunately the Beacon tool is not calibrated for use on Georgia counties. But we do not need it for this validation workflow.

Add Georgia state imagery to your map

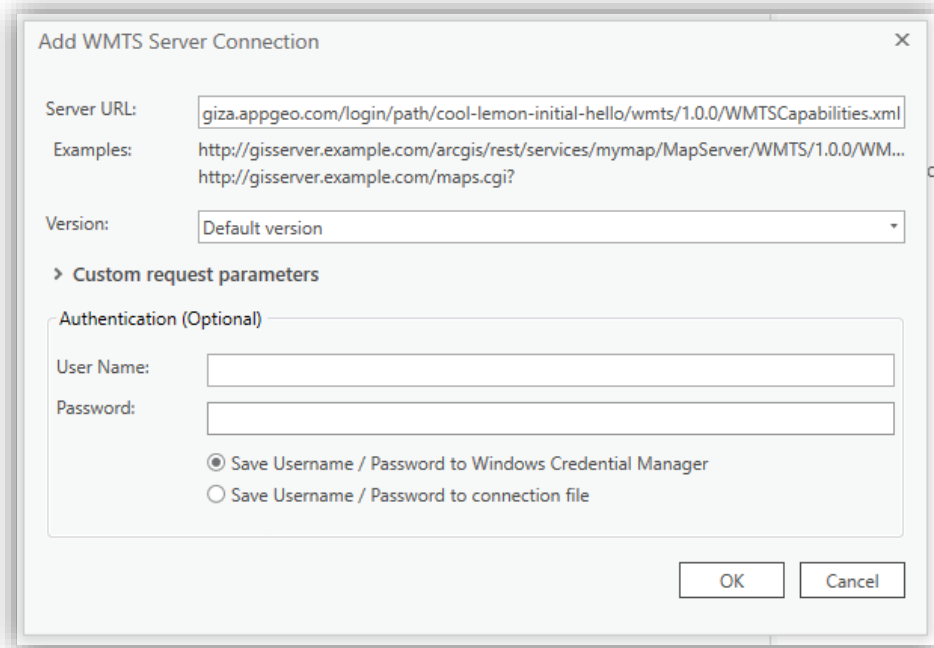

1. In the Catalog window, right click **Servers**

2. Click **New WMTS Server**

3. Input the Server URL:

<https://georgia-giza.appgeo.com/login/path/cool-lemon-initial-hello/wmts/1.0.0/WMTSCapabilities.xml>

4. Click **OK**
5. **GeorgiaGIO State Imagery** is now saved in your **Favorites** and can be added to your map
